

IMPORTANT NOTICE

Bruce to Milton Project Construction Activities

April 28, 2011

Dear Residents,

Hydro One would like to inform you about some upcoming construction activities in the Town of Milton associated with our Bruce to Milton Transmission Reinforcement Project.

Over the next several weeks our contractor, Valard Construction, will be installing conductor (wire) on the Hydro One right-of-way east of James Snow Parkway, between Main Street and north of Steeles Ave (see map on reverse). In order to string conductor onto the new towers, helicopters will be used and will be required to make short stops at each tower.

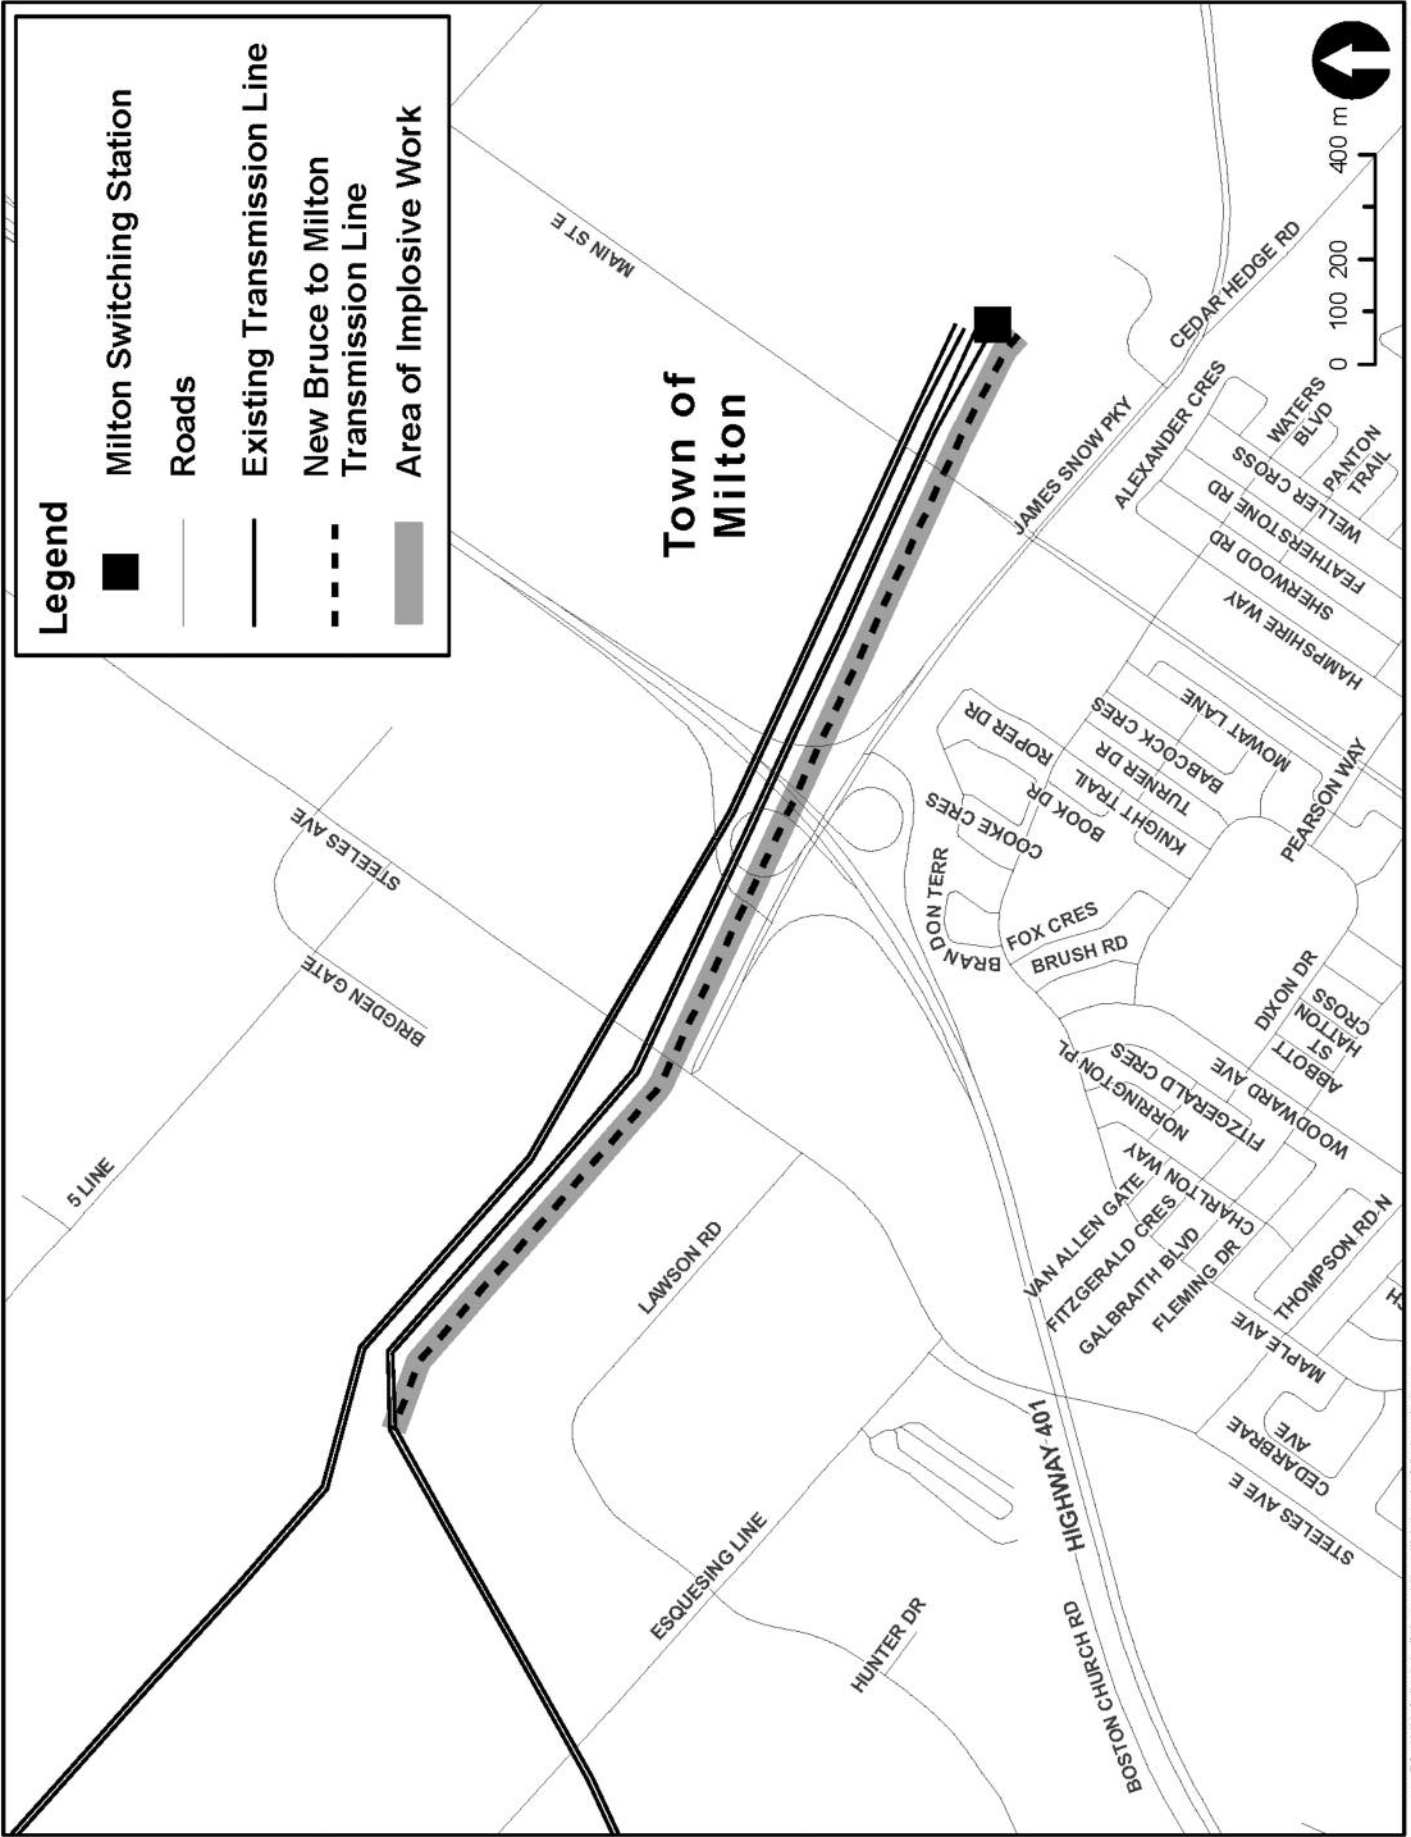

In order to fuse the conductor together, our contractor will be using implosive devices. This process makes a loud banging sound similar to that of a firearm discharging, so please do not be alarmed when you hear it.

These activities are scheduled to begin on Saturday, April 30, and will continue periodically, throughout the area until mid May, 2011. Crews will be working seven days a week, from 8 a.m. to 5 p.m. We expect several implosive connections will be made each day.

Hydro One will be notifying residents and businesses within one kilometre of the work sites. In addition, we will be notifying nearby schools, local police, ambulance and fire departments to ensure they are aware of the work.

We apologize in advance for the noise and any inconvenience this work may cause. We thank you for your patience while Hydro One and its contractor complete this critical 500 kilovolt transmission line that will add 3000 megawatts of transmission capability to Ontario's grid.

If you have questions or concerns, please feel free to contact Marty Dendekker, Construction Contact Officer at (519)873-0331, or our Community Relations Line toll-free at 1-877-345-6799, or by email at Community.Relations@HydroOne.com.
